

ANNOUNCEMENT OF OPPORTUNITY

GLOBAL SCIENCE IN THE ANTARCTIC CONTEXT

Call for prospective Principal Investigators

The British Antarctic Survey has a long-term strategy, and by 2012 aspires to be the leading international centre for Global Science in the Antarctic Context. As part of this strategy the Survey is developing plans for its research programme 2005-2010. The emphasis in the new programme will be on aspects of Earth System Science which require access to the Antarctic.
